## Eliminator™: The new Bug-proof, under-tree micro-sprinkler from NaanDanJain

■ This Bug-proof, under-tree micro-sprinkler for keeping all insects out is one of the newest products launched by NaanDanJain on the occasion of the IA show, where the product was selected to participate in the innovation award contest.

This innovative pressure-compensated micro-sprinkler prevents intrusion of all insects, including ants, snails, earwigs, spiders and Fuller's Rose Weevil. It is resistant to dust, sand, weeds and other external elements. It is

commercially available in a wide range of flow rates and distribution patterns.

## ESI releases Gro•Point™ Pro Sensor

■ Environmental Sensors Inc. (ESI) unveiled Gro•Point™ Pro at the 28th International Irrigation Show in San Diego, California. "Gro•Point™ Pro is the first single sensor for agricultural, golf and turf markets to monitor four critical soil data points," claims Blair Heffelfinger, President & CEO. The sensor incorporates four valuable outputs from 1 unrivalled, digital sensor: the world's most accurate Moisture Readings, Patented Bulk Conductivity Compensation and associated Output, Soil Temperature Compensation and associated Output, and Wetting Front. Unlike any moisture-sensing product on the market, the Gro•Point™ Pro contains,

within the same unit, a moisture sensor and a wetting front sensor, therefore allowing irrigation managers and farmers to know when to start, and exactly when to stop irrigation. Gro•Point™ Pro is small, easy to install with little or no soil disruption, is simple to operate, and is affordable, making it appealing to all agriculture, viticulture and turf markets.

## FUTURECO products get certification for use in Organic Farming

■ Five FUTURECO products have been issued the international organic input certification by BCS OKO Garantie in accordance with European (Regulation 2092/91, Annex II) and American standards (USDA / NOP-Final Rule 205,601 (j) (6), 205,602). The products henceforth labelled with BCS OKO logo are BESTCURE (Biostimulant with fungicide - bactericidal action), BIORADICANTE (Root system promoter), VITALEM FORTE (Aminoacids from vegetal origin obtained by enzymatic hydrolysis) DEFENDE IRON (Iron deficiency corrector) and

DEFENDER ZINC (Zinc deficiency corrector). BCS ÖKO-GARANTIE is an internationally recognized Certification Authority endorsed by the German Agency for Development Cooperation (GTZ). In addition, BCS is member of the International Federation of Organic Agriculture Movements - IFOAM - and the Independent Organic Inspectors Association - IOIA. This accreditation confirms FUTURECO's policy of supporting an environmental friendly agriculture by offering high-quality and ecological products.
